
42" LCD HDTV prices will drop dramatically

Posted by Richard - 2007/08/26 10:30

What are you guys thinking about the huge price drop of LCD TVs at the end of this year?

Dramatic price drops for 42 inch LCD HDTVs to be expected at the end of this year

Would you buy one? I personally would wait for an answer from the Plasma brands, because imho. Plasma still rules!

What is wrong with LCD? I like the picture quality! Plasma is to power-hungry in my opinion!

Funny you mention this, I thought you were looking for a Panasonic plasma ;) Well, to be honest, I also prefer Plasma, but in certain cases like a TFT monitor LCD do make sense.
